

### List of Fixed SAM Sites in Persian Incursion

This is a list of all the fixed long- and medium-range SAMs mentioned in the *Persian Incursion* Target Folders. It is not a list of all such sites in Iran, but only of the fixed sites defending the facilities that are potential targets in the game. Players have asked for this list so that if they attack SAM sites directly, they can keep track of which ones have been destroyed.

There are six S-200 [SA-56b Gammon] sites. These are the only sites which cover more than one location. All of the medium range SAMs defend a single location, although there are several locations with more than one facility (e.g., Arak has a reactor, a heavy water plant, and a refinery)

| <u>Type</u> | <u>Facility Description</u> | <u>Number of Lat</u> | <u>Long</u>   | <u>Coverage*</u>               | <u>Lch-ers</u> |
